Summary

Motivated front-end developer with proven experience constructing and developing complex applications in a collaborative environment. Passionate about creating clean user interfaces with attention to detail. Enjoy working with team members to problem-solve and develop features with the client in mind. Adaptive and always excited to learn.

Professional Experience

IBM

Front-end Developer
June 2021 - Present
Austin, TX

○ Took leadership on developing and maintaining reusable UI components for the broader product team. Enabled automatic and consistent updates of component package to ensure a reliable and cohesive UI.

○ Built a UI client from the ground up in collaboration with other developers, designers, and project managers. Allowed implementation of new product feature detailing product effectiveness and increasing sales.

○ Developed and presented complex UI features in an agile environment, closely working with and aiding designers in order to deliver a better user experience for our clients.

○ Participated in multiple thorough tests of the product, reviewing code and implementing bug fixes in order to improve usability and security ahead of release.
