- Webpack
- Jest
- Git

Summary

Dedicated front-end developer with 2 years of experience building features for large-scale web applications in an agile environment. Able to communicate effectively and cross-functionally at every stage of development. Passionate about innovative, impactful user experiences with attention to detail. Adaptive and always eager to learn.

Professional Experience

IBM
Front-end Developer
June 2021 - May 2023

Expertly coded robust applications that included user-friendly and functional visual elements. Improved tools and libraries to streamline developer processes. Communicated with clients and team members to identify needs, optimize interfaces, and run tests to ensure code performance.

Accomplishments

- Organized unmaintained common UI components and implemented automated package updates and release notifications, enabling a large product team to keep components consistently aligned.

- Collaborated closely with design and product management to iteratively develop UI features for a new application based on client needs. Within one release cycle, the application was in use by the sales team and contributed to increased product sales.
